Theorems and such

Albert-Ludwigs-Universität Freiburg

Definition

A triangle that has a right angle is called a *right triangle*.

Theorem

In a right triangle, the square of hypotenuse equals the sum of squares of two other sides.

Proof.

We leave the proof as an exercise to our astute reader. We also suggest that the reader generalize the proof to non-Euclidean geometries. □

Splitting a slide into columns

Albert-Ludwigs-Universität Freiburg

The line you are reading goes all the way across the slide. From the left margin to the right margin. Now we are going the split the slide into two columns.

Here is the first column. We put an itemized list in it.

- This is an item
- This is another item
- Yet another item

Here is the second column. We will put a picture in it.

The line you are reading goes all the way across the slide. From the left margin to the right margin.
